

Āyurvedic Health Counselor: Educational Outline for Competency

Minimum Total Hours of Study: 600 Hours

SECTION 1: FOUNDATION OF ĀYURVEDA

Minimum Total Hours of Study: 50 Hours

- **Understands Definition of Āyurveda, History of Āyurveda, Aṣṭāṅga Āyurveda (Eight branches of Ayurveda), Bṛhat trayī (Three primary texts of Ayurveda), Laghu trayī (Three secondary texts of Ayurveda)**
- **Understands Sāṃkhya Philosophy**
 - Prakṛti (Primordial nature), Puruṣa (Eternal cause)
 - Mahat (Causative Intelligence)
 - Ahaṃkāra (Ego Principle)
 - Manas (Mind)
 - Pañca tanmātras (Five subtle elements)
 - Pañca jñānendriyas (Five sensory organs of cognition)
 - Pañca karmendriyas (Five organs of action)
 - Pañca mahābhūtas (Five gross elements)
 - Relationship of jñānendriyas (Five sense organs), karmendriyas (Five organs of action), tanmātras (Five subtle elements) and mahābhūtas (Five gross elements)

SECTION 2: AYURVEDIC PHYSIOLOGY

Minimum Total Hours of Study: 100 Hours

Guṇas (Twenty Qualities)

CAAM Scope Description: The counselor has skills and competence in determining which guṇas are predominant in prakṛti (individual constitution) and vikṛti (pathological condition) and demonstrates the following ability/abilities:

- To determine the role and influence of the 10 pairs (or 20 total) of gurvādi guṇas (opposing qualities) in the prakṛti (individual constitution) and vikṛti (pathological condition) through the data received from the history and examination of the client.

Related Pre-requisite or Complementary Knowledge of:

- The gurvādi guṇas (10 pairs of opposing qualities) associated with the pañca mahābhūtas (five elements) and the three doṣas
- The guṇas (qualities) causing doṣas to accumulate and become aggravated
- How diet, climate, season and age impact the guṇas(qualities) and subsequently contribute to the cause of disease
- What constitutes excess, deficiency and the imbalance of the guṇas (qualities) in doṣa vikṛti (Abnormal doṣa variance)
- The theory of similar and dissimilar and balancing the guṇas (qualities) through proper daily and seasonal routines for a person of each constitutional type

Prakṛti (Individual constitution) and Vikṛti (Pathological condition)

CAAM Scope Description: The counselor has the skills required to assess the physical and mental prakṛti (individual constitution) and doṣic imbalance using trividha (three-fold diagnostic method) aṣṭavidha (eight-fold diagnostic method) and daśavidha parīkṣā (ten-fold diagnostic method)

The counselor has knowledge of:

Trividha Parīkṣā (Three-fold Diagnostic Method)

- Darśana (Observation)
- Sparśana (Palpation)
- Praśna (Questioning)

Eight-fold Diagnostic Method (Aṣṭavidha Parīkṣā)

- Nāḍī Parīkṣā (Pulse Assessment)
- Mūtra Parīkṣā (Urine Assessment) – theoretical knowledge only
- Mala Parīkṣā (Stool Assessment) – theoretical knowledge onl

- Jihvā Parīkṣā (Tongue Assessment)
- Śabda Parīkṣā (Speech and Voice Assessment)
- Sparśa Parīkṣā (Skin Assessment)
- Dṛk Parīkṣā (Assessment of Eyes)
- Ākṛti Parīkṣā (General Appearance of external features)

Ten-fold Diagnostic Method (Daśavidha Parīkṣā)

- Dūṣyam (Structural and functional abnormalities of the body)
- Deśam (Geographical nature of the place where client lives)
- Balam (Physical strength)
- Kālam (The season and climatic conditions)
- Anala (digestive fire of the client)
- Prakṛti (Constitution)
- Vayas (Age of the client)
- Sattva (Psychological nature of the client)
- Sātmya (General and personal habits of the client)
- Āhāra (Nature of the patients diet)

Additional items:

- Sāra (Quality of Dhātus)
- Samhanana (Physical Build)
- Pramāṇa (Measurement of Body- Height, Weight, Posture, Circumference of Head)
- Sātmya or client's ability to adapt to Āhāra (Diet), Dravya (Herbs), Vihāra (Lifestyle and Behavior)
- Āhāra Śakti (Ability to Digest)
- Vyāyāma Śakti (Stamina, endurance and capacity to exercise)

Related Pre-requisite or Complementary Knowledge of:

- Tridoṣa (three humors) theory including the gurvādi guṇas (10 pairs of opposite qualities)
- Physical and mental attributes in a prakṛti (individual constitution) including but not limited to height, weight, color of eyes, skin, mental abilities, memory, intellect, diet, tastes, digestive fire, quality of skin, temperature, hair, appetite, elimination, stress factors
- Physical and mental attributes that change with time: diet, climate, season, stress and environment
- Changes in vikṛti (pathological condition) due to changes in agni (digestive fire), guṇas (qualities) resulting in digestive disorders, appetite and elimination changes
- Guṇas (attributes) that cause the doṣas to accumulate and become aggravated
- Āhāra (diet) and hatu (lifestyle); how diet, climate, season and age impact the prakṛti (individual constitution) and subsequently contribute to doṣa vikṛti (aggravation of doṣa) and cause of disease
- What constitutes excess, deficient and the imbalance of doṣas within their own site
- Theory of similar and dissimilar and balancing the doṣa vikṛti (aggravation of doṣa) through a proper daily routine, seasonal routine and basic rasas (six tastes) for a person of each constitutional type

CAAM

1111 South Ogden Drive, Los Angeles, CA 90019.

www.ayurveda-caam.org. email: Hello@Ayurveda-CAAM.org

Doṣas, Sub-doṣas, Dhātus (Tissues), Srotāṃsi (Pathways)

CAAM Scope Description: The counselor exhibits skills and competency in determining the state of doṣas, sub-doṣas, dhātus, upadhātu (By products of nutrition) and srotāṃsi (pathways), then able to assess the following:

The counselor is able to assess the state of doṣas, and sub-doṣas, dhātus (tissues), upadhātus (By products of nutrition), and srotāṃsi (pathways) involved through darśana (observation), sparśana (palpation) and praśna (asking questions) and is able to interpret the information received.

Darśana (Observation)

- The ability to interpret information that has been received upon darśana (observation) to determine the involvement (vitiation) of doṣas, sub-doṣas, dhātus (tissues) and srotāṃsi(pathways).

Sparśana (Palpation)

- The ability to interpret information that has been received upon palpation (sparśana) to determine the involvement (vitiation) of doṣas, sub-doṣas, dhātus (tissues) and srotāṃsi (pathways).

Praśna (Interview / Questioning)

- Asking questions about the current state of digestion, elimination, sleep, stress level, energy level and emotional level.

Related Pre-requisite or Complementary Knowledge of:

- Healthy dhātus – tissues (dhatu sārata – Signs of ideal tissues).
- How to properly examine the client utilizing the methods of trividha parīkṣā (three-fold clinical assessment), aṣṭavidha parīkṣā (eight fold clinical assessment), daśavidha parīkṣā (tenfold clinical assessment)
- Definition, qualities, locations, actions and functions of the three doṣas and 15 sub-doṣas
- Causes of imbalance, signs of imbalance of the three doṣas and 15 sub-doṣas
- Definition, location and function of the dhātus (tissues) and how they are formed.
- Definition of upadhātus (By products of nutrition) and hatu malas (waste products of nutrition)
- Relationship between dhātus (tissues), upadhātus (By products of nutrition) and hatu malas (waste products of nutrition)
- Definition, types, qualities and functions of ojas (Essence of Nutrition)
- Relationship of doṣas and dhātus (tissues)
- Definition, origin and function of the srotāṃsi (pathways)
- Factors causing abnormality of dhātus (Tissues)
- Vṛddhi (aggravation) and kṣaya (depletion) of the doṣas and dhātus (tissues)
- Normal and abnormal functions of srotāṃsi (pathways)

CAAM

1111 South Ogden Drive, Los Angeles, CA 90019.

www.ayurveda-caam.org. email: Hello@Ayurveda-CAAM.org

Agni (Digestive fire) – Āma (Undigested material), Malas (Waste)

CAAM Scope of Description: The counselor can assess the state of the malas (waste), agni (digestive fire), and āma (undigested material) through praśna (questioning) and darśana (observation).

The counselor has the following skills:

- Ability to determine the state of agni (digestive fire) by questioning the client for rugṇa patrakam (Client intake form).
- Questioning about appetite, digestion and elimination
- Ability to recognize the signs and symptoms of āma (undigested material) in the body
- Questioning about digestion
- Observation of tongue, stools and body odor
- Ability to recognize the signs and symptoms of normal and vitiated mala (waste)
- Questioning about urination, elimination and sweat patterns
- Observation of the urine stools and sweat to include color, volume, odor, clarity

Related Pre-requisite or Complementary Knowledge of:

- Symptoms and signs of the four states of agni (digestion)
- Definitions of āma (undigested material), agni (digestive fire) and mala (waste)
- How āma (undigested material) is formed
- Types agni (digestive fire) and āma (undigested material)
- Functions of agni (digestive fire)
- Signs and symptoms of the altered states of agni (digestive fire)
- Signs and symptoms of āma (undigested material) in the mūtra (urine), purīṣa (feces), sveda (sweat), on the jihvā (tongue), netra (eyes), nakha (nails), tvak (skin), etc.
- Functions of the malas (waste)
- What constitutes the normal and abnormal quantity and qualities of malas (waste)

Prāṇa (vital energy) –Tejas (radiance) –Ojas (essence of life)

CAAM Scope Description: The counselor can determine the state of prāṇa, ojas and tejas

The counselor can assess the following:

- The state of prāṇa (vital energy), tejas (radiance) and ojas (essence of life) through observation and the interview process (consultation) which explores the state of prāṇa (vital energy), tejas (radiance) and ojas (essence of life).

Related Pre-requisite or Complementary Knowledge of:

- Definition of prāṇa (vital energy), tejas (radiance) and ojas (essence of life)
- Relationship of prāṇa (vital energy), tejas (radiance) and ojas (essence of life) to vāta, pitta and kapha
- Signs of healthy or balanced prāṇa (vital energy), tejas (radiance) and ojas (essence of life)
- Symptoms of low ojas (essence of life)
- Displaced ojas (essence of life)
- Factors causing imbalance in prāṇa (vital energy), tejas (radiance) and ojas (essence of life)

SECTION 3: ASSESSMENT AND DIAGNOSIS

Minimum Total Hours of Study: 100 Hours

Personal and Family Health History

CAAM Scope of Practice: The counselor has the necessary skills to be able to effectively take a detailed current and past, personal and family health history with the following ability/abilities:

- Asks questions which gather the appropriate information necessary to understand the prakṛti (individual constitution) and vikṛti (pathological condition) of the client and refers a client for disease management care, when necessary.

Related Pre-requisite or Complementary Knowledge of:

- What the chief complaint is, based on initial consultation and the importance of mitigating factors such as: origin, duration, progress, factors that aggravate and relieve the symptoms.
- Past medical history, including: Illness, injuries, surgeries, hospitalizations
- Family history affecting vikṛti (pathological condition) of the client
- Social history affecting vikṛti (pathological condition) of the client
- Roles of work relationships and home environment affecting vikṛti (pathological condition) of the client
- Medication and supplements a client is taking
- Any food or drug allergies or intolerances the client has
- Nutritional habits of the client

- Good listening skills, eye contact and develops rapport with client
- How to ask open ended questions with each client
- The importance of obtaining a good health history and demonstrates this ability
- Accurate assessment and plan of action
- Client's satisfaction of Āyurveda methodology
- Improving the understanding of the consultation
- Improvement of client compliance to any suggestions or guidelines given

Vital Signs

CAAM Scope Description: The counselor has the skills to be able to effectively take basic vital signs such as raktacāpa (blood pressure).

These abilities are demonstrated by:

- Taking a client's measurements: (Requires a description of measurements)
- Assessing a client's height and weight
- Taking a client's pulse
- Taking the blood pressure

Related Pre-requisite or Complementary Knowledge of:

- **Pulse**
 - Able to interpret pulse rate, rhythm and volume
 - Taking pulse at appropriate site
 - Normal and abnormal pulses
- **Blood Pressure**
 - Determining what is blood pressure
 - The systolic and diastolic pressure (normal, abnormal, physiology)
 - Measuring blood pressure
- **Respiration**
 - Determining respiration
 - Normal and abnormal respiration

Nidāna (Etiological Factors)

CAAM Scope Description: The counselor has the skills to determine the nidāna (etiological factors) responsible for the doṣic imbalance and demonstrates the following ability/abilities:

- Interprets and understands the case history of the client
- Conveys the factors causing the general doṣic imbalance with the client

Related Pre-requisite or Complementary Knowledge of:

- The three fundamental causes of disease: Asātmyendriyārtha saṃyoga (abnormal interaction of senses and their objects), prajñāparādha (intellectual transgression) , pariṇāma (change due to time)
- How the senses might be misused (over-used, under-used or wrongly used) in a manner that causes the doṣas to become aggravated
- How daily and seasonal routines impact the flow of the doṣas
- Qualities that cause the doṣas to go through the six stages of pathogenesis
- How constitution, climate, season and age impact the movement of the doṣas
- Additional nidānas (causative factors) in the disease process
- How the suppression of natural urges contributes to the disease process

Samprāpti (Pathogenesis)

CAAM Scope Description: The counselor can determine the current stage of samprāpti by darśana (observation), sparśana (touch) and praśna (questioning) and assess the following:

- Evaluate the client and determine the stage of pathology the client is experiencing.
- Discerning the difference between the stages of sañcaya (accumulation), prakopa (aggravation) and prasara (overflow) and relocation, manifestation and differentiation in order to have knowledge of the limitations of the scope of practice.

Related Pre-requisite or Complementary Knowledge of:

- Each stage of samprāpti (pathogenesis)
- General signs and symptoms all stages of samprāpti (pathogenesis)
- How the stages of pathology are affected/influenced by season, climate and age

COUNSELING SKILLS

CAAM Scope of Practice: The counselor has the necessary skills to provide counseling with the following ability/abilities:

- Conveys information and ideas correctly (to educate)
- Listens and understands
- Supports a client to make positive changes in his/her life
- Earns the clients trust

Related Pre-requisite or Complementary Knowledge of:

- Communicating effectively
- Demonstrating effective skills for counseling
- Recommending changes in diet and lifestyle as necessary, due to doshic tendencies and how they relate to challenges
- Supporting each person to make successful changes based on their constitutional type
- Supporting a rājasika (hyperactive /motivated) and tāmasika (dull/ disassociated) client to make changes
- Demonstrating good bedside manner
- The following areas of knowledge are generalized and no specific methodology has been determined. Schools are encouraged to include their own methodologies in their curriculum. No competencies will be evaluated in these areas
- Understanding body language
- Understanding tone of voice
- Asking relevant questions
- Ability to paraphrase and summarize
- Demonstrates active listening
- Discern nonverbal communication
- Referring clients to theory references including books and other reference materials that support self-learning

Client Strengths and Assets

CAAM Scope of Practice: Assessing and determining client's strengths and willingness to follow recommendations

The counselor can assess the following:

- Client's compliance
- Memory of the client

Related Pre-requisite or Complementary Knowledge of:

- How the qualities noted above influence the outcome of a case.

History Taking

CAAM Scope of Practice: The counselor can collect case studies to contribute to research on health promotion and svasthavṛtta (disease prevention). The counselor can prepare a case study based on the clients who have become a part of the practice.

Related Pre-requisite or Complementary Knowledge of:

- How to write up a case study including the proper format to summarize the following:
 - Patient information
 - Age
 - Sex
 - Occupation
 - Client's goals
 - Prakṛti (individual constitution) and Vikṛti (pathological condition)
 - Patients state of agni (digestive fire), āma (undigested material), ojas (essence of life) and mala (waste)
 - Treatment plan
 - Diet
 - Lifestyle
 - Herbs
 - Frequency of appointments
 - Progress of each appointment
 - Adjustments to the plan at each visit
 - Final outcome
 - Comments about what aspects of case management were most successful and what aspects were least successful
 - Comments about what could have been done differently that may have produced a more positive outcome

SECTION 4: RECOMMENDATIONS, TREATMENT AND OTHER INTERVENTIONS

Minimum Total Hours of Study: 250 Hours

Āhāra: Food/Diet

CAAM Scope Description: Recommendations The counselor can recommend or prescribe the appropriate food choices and proper āhāraavidhi (eating behaviors) in accordance with the prakṛti (individual constitution), vikṛti (pathological condition), guṇas (qualities), rasa (taste), ṛtu (season), agnibala (digestive strength) and vaya (age) of the client.

CAAM Scope Description Treatment and Intervention: The counselor can demonstrate the selection and preparation of appropriate foods and spices as per the prakṛti (individual constitution), vikṛti (pathological condition), guṇas (qualities), rasa (taste), ṛtu (season), agnibala (digestive strength) and vaya (age) as well as demonstrate proper āhāraavidhi (eating behaviors) through their own practice.

The counselor can:

- Recommend appropriate food and dietary guide lines to promote and restore balance based on prakṛti (individual constitution), vikṛti (Pathological condition), agni (digestive fire) and āma (undigested material).
- Recommend fasting when appropriate
- Teach and support the client to implement proper dietary guidelines into their lives
- Prescribe specific foods and spices
- Discuss with the client how to properly prepare the food/meals
- Discuss and teach the proper rituals of eating
- Discuss and teach how to adapt diet to the season and age of a client

Pre-requisite and Complementary Knowledge:

- **General Knowledge of the six tastes**
 - Six tastes, their elemental make up and qualities
 - Rasa (taste), vīrya (potency) and vipāka (post digestive effect) of the tastes
 - The gurvādi guṇas (10 pairs of opposite qualities) of each taste
 - Effects of each taste on doṣas, dhātus (tissues) and malas (waste)
 - Tastes that are bṛīṃhaṇa (nourishing) and those that are laṅghana (depleting)
 - Effect of the tastes and foods on agni (digestive fire) and āma (undigested material)
 - Elemental make up of foods (mahābhoutika āhāra – five elements in food)
- **Dietary Guidelines**
 - Suggests proper guidelines for healthy eating
- **Specific Foods and Spices**
 - Foods in each major category (Grains, meats, dairy, etc) and their effect on their actions on the three doṣas

CAAM

1111 South Ogden Drive, Los Angeles, CA 90019.

www.ayurveda-caam.org. email: Hello@Ayurveda-CAAM.org

- Spices and their effect upon the doṣas
- **Fasting**
 - Fasting able to offer types of fasting
 - Liquid, juice, fruit, one meal per day
- **Preparation of Food**
 - How processing food changes its qualities
 - How to prepare basic foods such as kichari, ghee and buttermilk
- **Rituals of Eating**
 - Importance of saying grace before meals
- **Other**
 - Importance and intake of uṣhāpāna (cooked water) in the mornings

Vihāra: Lifestyle

CAAM Scope Description. Skills and Competencies: The counselor can recommend or prescribe appropriate dinacaryā (daily), ṛtucaryā (seasonal) and life cycle routines as per the prakṛti (individual constitution), vikṛti (pathological condition), and guṇas (qualities). The counselor can recommend at-home svasthavṛtta (preventive and promotive) measures and sadvṛtta (positive conduct) measures.

Scope of Practice Description Treatment and Intervention:

The counselor can demonstrate the dinacaryā (appropriate daily), ṛtucaryā (seasonal) and life cycle routines according to prakṛti (individual constitution), vikṛti (pathological condition), and guṇas (qualities). By demonstrating at-home svasthavṛtta (preventive and promotive) and sadvṛtta (positive conduct).

The counselor can recommend, prescribe and demonstrate the following:

- Recommend daily routines (review techniques with client)
 - Recommend proper oral hygiene (tongue cleaning, teeth brushing and flossing)
 - Taking care of Eyes (eye wash)
 - Self abhyaṅga (oil application)
 - Drinking uṣhnāpāna (cooked water) in the morning
 - Tongue cleaning
 - Eye washes
 - Netī (nasal salve)
 - Activities to promote sleep before bed
- Recommend adjustments to the daily routine based on season
- Support the client to make life style changes
 - Adjusting bed times and wake up times according to dosha, as well as season
 - Times to take food

- Instruct the client in modifying lifestyle in accordance with the seasons
- Sadvṛtta (Good moral conduct)
 - Encourage devotional and spiritual practices
 - Encouraging mindfulness throughout the day
 - Encourage to cultivate loving kindness, compassion, joy and equanimity

Related Pre-requisite or Complementary Knowledge of:

- Doṣas increasing or decreasing during different times of the day and season
- Age affecting the doṣas and agni (digestive fire)
- Influence of appropriate physical, devotional, spiritual practices on doṣas and guṇas (qualities)
- Twenty guṇas (qualities), doṣas, agni (digestive fire), āma (undigested material), ojas (essence of life)
- Mahāguṇas – sattva, rajas, tamas (Three Primal States)
- Drinking uṣhnāpāna (cooked water) in the morning
- Lifestyle impacting digestion and elimination
- A regular routine influencing the doṣas
- Practice of abhyaṅga (oil application), the oils to be used for abhyaṅga (oil application), different types of abhyaṅga (oil application)
- Effective use of daily routine
- Effective use of seasonal routine
- Devotional and spiritual practices affecting the mind and body
- Rātrīcaryā (evening routine)
- Ṛtusandhi (transition of the seasons)
- Rasāyana (rejuvenating) foods
- Vājīkaraṇa (aphrodisiac) foods
- Resisting and not resisting urges

Ayurvedic Psychology

CAAM Scope Description: The counselor can recommend āhāra (diet), vihāra (lifestyle) and ācāra (positive conduct) to maintain a healthy mind.

CAAM Scope Description: The counselor can design, implement and manage a plan to pacify the doṣas within the mind.

Related Pre-requisite or Complementary Knowledge of:

- Diagnosing the mental prakṛti (individual constitution) and vikṛti (pathological condition) by quantifying sattva (purity and knowledge), rajas (action and passion), and tamas (ignorance and Inertia)
- The effects of sensory input on the mind
- Effective use and misuse of the five senses
- Overuse, deficient use and misuse for each sense organ
- Prāṇa (vital energy), tejas (Radiance) and ojas (essence of life) and how to determine their state
- Three guṇas (qualities) and how to determine their state
- What constitutes healthy behavior
- Effect of sensory input on the mind
- Designing a treatment program utilizing diet, lifestyle, adjustments to behavior and how the senses are used
- Various approaches to implementing the treatment program including adjusting the pace of implementation of the program based on a client's prakṛti (individual constitution) and vikṛti (pathological condition)
- Effective case management
 - Knowledge of how to conduct follow up visits to monitor progress and make adjustments to the treatment plan including
 - Checking in on how the client is doing implementing assignment/homework plan and lifestyle changes
 - An ability to support the client to be more successful in implementing the treatment plan
 - An ability to assign additional homework / assignments or lifestyle changes at an appropriate time
 - Utilizing of the counseling process noted in the counseling section of this document
- Knowledge of four aspects of mind- manas, citta, buddhi (intellect), ahaṁkāra (ego)
- Knowledge of definition, qualities, location and functions of mind

CAAM

1111 South Ogden Drive, Los Angeles, CA 90019.

www.ayurveda-caam.org. email: Hello@Ayurveda-CAAM.org

Doṣas Śamana (Pacification)

CAAM Scope Description. Recommendations: The client can recommend śamana (pacification) therapies to balance the doṣas and eliminate āma (undigested material).

CAAM Scope Description. Treatment and Invention: The counselor can design, implement and manage a plan for pacifying the doṣas and eliminating āma (undigested material).

The counselor can make the following recommendations and implement that following therapies with the goal of pacification of the doṣas:

- **Herbs and spices:** Those that are dīpana - increase agni (digestive fire) and pācana (metabolize āma)
- **Diet:** See food section (kṣut nigraha – controlling hunger)
- **Vyāyāma (Exercise)**
- **Heat therapies** - agni and anagni cikitsā (therapies with and without fire)

Related Pre-requisite or Complementary Knowledge of:

- **7 traditional forms of palliative therapy**
 - Dīpana: Herbs/spices that increasing agni
 - Pācana: Herbs/spices that digest āma
 - Kṣudhā nigraha: Control over diet including the use of fasting
 - Tṛṣṇā nigraha: Control over water and oil intake
 - Vyāyāma: Use of exercise
 - Ātāpa sevana: Forms of creating heat without directly increasing agni such as sunbathing
 - Māruta sevana: Ways to cool the body to protect pitta dosha such as moon walks
- Āyurveda anatomy and physiology, qualities, elements, doṣas, sub-doṣas, dhātus (tissues), upadhātus (by products of nutrition), malas (waste), srotas (pathways), agni (digestive fire), āma (undigested material), ojas (essence of life)
- Indications and contraindications for palliation therapy
- How to design a palliation program to correct an imbalance in each doṣa
- Effective application of each therapy noted above
- Assessing the client's state of agni (digestive fire), āma (undigested material) and ojas (essence of life)
- Assess digestion, tongue, stools and body odor as a means of identifying āma (undigested material) in the body
- Assessing doṣa vikṛti (pathological condition)
- Use of herbs and spices for balancing agni (digestive fire) and eliminating āma (undigested material)
- Effective, safe and appropriate, application of diet, herbs, sensory therapies, exercise and heat treatments

Shodhana- See the Addendum to the NAMA AHC Competency guideline

Rasayana (Rejuvenation)

CAAM Scope Description. Skills and Competency: The counselor can recommend Rasayana for the body and mind.

CAAM Scope Description. Treatment and Intervention: The counselor can design, implement and managing a Rasayana protocol for sustaining the health of the body and mind.

The counselor can make the following recommendations and provide the following treatments and interventions:

- Dietary therapies that promotes nourishing
- Herbal therapies that promotes nourishing
- Internal and external snehana (oil therapies)
- Daily routines and lifestyle that promotes nourishing

Related Pre-requisite or Complementary Knowledge of:

- Indications and contraindications for nourishing therapy
- Designing a nourishing program in accordance with the doṣa vikṛti (pathological condition)
- Managing a nourishing program and adjust the program in accordance with the client's progress
- Assessing the state of agni (digestive fire), āma (undigested material) and ojas (essence of life)
- How to assess the dhātus (tissues) and the signs of depletion

Principles of Ayurvedic Healing

CAAM Scope Description. This module is designed to develop critical thinking and clinical reasoning skills and to create an appropriate healing plan for health promotion and wellness care. The counselor can recommend or prescribe a plan to balance the doṣas for health promotion and wellness care.

CAAM Scope Description. Treatment and Intervention Skills: The counselor can design, implement and manage a plan to balance the doṣas for health promotion and wellness care

The counselor can make the following recommendations:

- Appropriate diet and lifestyle
- Recommendation of selective herbs for rejuvenation and health promotion
- Recommendation of selective Ayurvedic therapies for rejuvenation and health promotion
- Recommend selective yoga for rejuvenation and health promotion
- Monitor client's progress and make the appropriate adjustments to the plan

CAAM
1111 South Ogden Drive, Los Angeles, CA 90019.
www.ayurveda-caam.org. email: Hello@Ayurveda-CAAM.org

Related Pre-requisite or Complementary Knowledge of:

- Supporting digestion and balance the patients agni (digestive fire)
- Prevention and treatment āma(undigested material)
- Supporting healthy elimination
- Six tastes
- 13 types and 4 states of agni (digestive fire).
- Identifying āma (undigested material)
- Healthy and unhealthy food combinations
- First three stages of saṃprāpti (pathogenesis)
- The signs of three doṣas at each stage of saṃprāpti (pathogenesis)
- Foods, lifestyle and herbs that pacify the doṣas in the digestive system
- Factors that cause imbalance in the doṣas (nidāna)

Panchakarma

CAAM Scope Description. Recommendations: The counselor can recommend Ayurvedic bodywork techniques for health promotion and wellness care

CAAM Scope Description. Treatment and Interventions: The counselor can offer. Ayurvedic bodywork techniques for health promotion and wellness care

The counselor can make the following recommendations and provide the following treatments and interventions:

- Recommend and demonstrate Abhyanga (oil application)
- Recommend and demonstrate Shirodhara
- Recommend and demonstrate Nasya, Kativasti, Januvasti and Greevavasti

Related Pre-requisite or Complementary Knowledge of:

- Dinacaryā (daily routines) for svasthavṛtta (good health)
- Procedures for oleation
- Precautions to take during procedures
- The indications and contraindications for each procedure
- Utilizing diet, lifestyle and herbs to pacify the doṣas in the head and neck
- The techniques of Śīro abhyaṅga (head massage), Karṇa pūraṇa (oleation of the ears), Nasya (oleation of the nose) and Kavala (oleation of the gums) and Gaṇḍūṣa (oil pulling)
- Techniques for massaging the face and neck

Herbs

CAAM Scope Description. Recommendation: The counselor can recommend the appropriate herbs for health promotion and wellness care to accomplish balanced agni (digestive fire), elimination of āma (undigested material) and support the malas (waste) while protecting and building ojas (essence of life).

CAAM Scope Description. Treatment and Intervention: The counselor can recommend herbs, or other natural substances for internal or external use with focus on health promotion and wellness care.

Related Pre-requisite or Complementary Knowledge of:

- Herb classification and their energetics based on rasa (taste), vīrya (potency), vipāka (post-digestive effect), guṇa (quality) and prabhāva (specialized therapeutic effect)
- The karma (actions) of herbs. The counselor is informed of the major actions of an herb. When Western terminology matches the Saṃskṛt terminology, the Western terms should be known. When a unique action is described in Saṃskṛt that has no simple translation into English, then the Saṃskṛt terminology for that action should be known
- The effect an herb has on the agni (digestive fire), āma (undigested material), doṣas, and malas (waste)
- How to prepare cūrṇa (powdered mixtures)

Knowledge of the most traditional herbal formulations from classical Āyurvedic texts that support agni (digestive fire) and reduce āma (undigested material) as well as rasāyanas (rejuvenators).

- Trikaṭu cūrṇa
- Triphala cūrṇa
- Hiṅgvāṣṭaka cūrṇa
- Cyavanaprāśa

YOGA

CAAM Scope Description. Recommendation: The counselor can refer clients to a practitioner of Yoga or Āyurvedic Yoga Therapy for assessment and education on the general scope and value of Āyurvedic Yoga Therapy.

CAAM Scope Description. Treatment and Intervention: The counselor is informed on Āyurvedic Yoga Therapy but its practice requires a separate certification.

The counselor can:

- Refer the patient to practitioner of Āyurvedic and Medical Yoga Therapy.

Related Pre-requisite or Complementary Knowledge of:

- General understanding about Āyurvedic Yoga Therapy
- The scope of practice of Āyurvedic Yoga Therapy
- How an Āyurvedic Yoga Therapy can complement client care
- Therapeutic tools utilized by a practitioner of Āyurvedic Yoga Therapy

WESTERN MEDICAL APPROACHES

CAAM SCOPE DESCRIPTION: The counselor can refer a client for assessment and possible treatment by a medical practitioner.

The counselor can make the following recommendations:

- A referral to an appropriate Western Medicine Practitioner at the appropriate time.

Related Pre-requisite or Complementary Knowledge of:

- The scope of practice of a Medical Practitioner, including which type of specialist is appropriate for the client's condition
- Knowledge of red flag symptoms that require a referral
- How a Western Medical Practitioner can complement the care being provided by the Āyurvedic Health Counselor
- The counselor can explore lifestyle issues that may be affecting the client's sleep and make lifestyle recommendations.

Doṣa Śhodhana (Purification)

CAAM Scope Description. Recommendations: The counselor can understand the principles of śhodhana (purification) to balance the doṣas and eliminate āma (undigested material) and can refer clients for śhodhana to qualified practitioner or Ayurveda Doctor.

CAAM Scope Description. Treatment and Invention: The counselor can understand the principles of śhodhana of the doṣas and eliminating āma (undigested material).

The counselor can understand the principles of śhodhana (purification) and learn following concepts and śhodhana (purification) therapies with the goal of learning the methodologies to have an ability to refer the client for śhodhana (purification):

- **Principles of śhodhana (purification)-** Concept of purification through Pancakarma
- **Process of Panchakarma-** stages of śhodhana (purification) or Pancakarma
- **Purvakarma (Preparation for Panchakatma)-** Methods of dīpana - increase agni (digestive fire) and pācana (metabolize āma), Snehana (Oleation) and Swedana (Sudation)
- **Pradhana Karma (the Main Panchakarma therapies)-** Vamana (Therapeutic emesis), Virechana (Therapeutic purgation), Vasi/Basti (Therapeutic enemas), Nasya (Nasal administration) and Raktamoksha (Bloodletting)
- **Paschat Karma (Post-Panchakarma Recuperation)-** Principles of post-panchakarma recuperation- diet, lifestyle and herbs after the Panchakarma protocol
- **Rasayana (Rejuvenation) –** Methods of rasayana (rejuvenation)
